VEGAS VIDEO POKER

The *"Play & Learn to Win Series"* is designed to improve your gambling skills. Vegas Video Poker, with its sophisticated analysis features and detailed write-ups in the accompanying reference guide, can be used to learn how to play all of the hands you will encounter when playing Video Poker. Take the pocket reference card with you to the casino.

Video Poker is not a slot machine:

Winning on a slot machine is pure chance. Holding and discarding the right cards in Video Poker will determine your winnings — not chance alone. Learn the correct strategy to win at Video Poker.

R: Resume Z: Zero E: Exit
XVI. FOUR CARDS TO A FLUSH, HIGH PAIR
Example: 3♥ 7♥ 8♥ K♥ K♣
Options:
HOLD: K♥ K♣ Payback Ratio: 1.554
HOLD: 3♥ 7♥ 8♥ K♥ *Payback Ratio: 1.029
Example XV shows that holding four to a flush is a better option than holding a low pair. XVI shows that holding a high pair is a better option than holding four to a flush. This example points out that giving up a winning combination — in hopes of a higher winning hand — is usually a losing move.
*Machine B yields a payback ratio of 1.221 for the second option, but that still falls short of the 1.554 for holding the high pair.

Video Poker is not the same as playing at a poker table:

At the poker table, you match your skill against other players by betting, raising, bluffing and folding. There are as many different winning strategies as there are players. With Video Poker you play against set odds. There is only one best strategy to win at Video Poker.

Vegas Video Poker

This program duplicates the casino machines plus much more! Optional prompts teach the best strategy for every hand dealt. A running tally of hands and winning combinations is kept for inspection. Do NOT depend on just luck or impulse when you can learn the winning strategy.

The strategies in this program are based on computer simulations over millions of hands. Success in the casino depends on your ability, luck, and the amount of time played.

We cannot guarantee you will win, but you will become a better player.
